This a sample only. It is **not** to be used for your Plot Plan

Sample calculation formulas to figure Area of Disturbance (AOD) for Dust Control.

1. Structures = (overall length + 20ft) x (overall width + 20 ft)
Example – A structure 100 x 50 would equal 8400sqft (120 x 70)
2. Trenching for water & Power = 20ft wide x the length.
3. Leach Fields = 30ft wide x the length
4. Traffic Areas = 30ft wide x the length
5. Materials Staging Areas = Show the actual size

It is not required to label each area. The above are used as examples of what must be considered when calculating the total Area of Disturbance for your project.
